Minuet is a series of square trimless recessed downlights in aluminum injection. Damp location certified. A frame in polycarbonate for the frosted diffuser in white. The standard option for the diffuser is flood illumination, special optics with different aperture reflectors can be specified. In case of service of the lighting modules, they can be removed with no tooling. Dimmable and non dimmable, in 2700 K and 3000K.

High power versions replace HID sources, are dimmable, and on /off with no delays on restarting.

These options can be connected to control systems and occupancy sensors.

The wood is FSC certified and locally harvested. The finish is eco-friendly (green seal recommended, formaldehyde free and suitable for LEED projects). Damp location listed.
